

Flying Air Force Heavy Iron In The 60s 70s And 80s: A Pilot's Story

In the 1960s, 1970s, and 1980s, the Air Force's heavy iron was the backbone of the nation's defense. These massive aircraft, including the C-5 Galaxy, the C-141 Starlifter, and the KC-135 Stratotanker, were responsible for transporting troops, cargo, and fuel all over the world.

Tinman's Tale: Flying Air Force Heavy Iron in the 60s, 70s and 80s by Gary Goebel

In his new book, *Flying Air Force Heavy Iron In The 60s 70s And 80s*, retired Air Force pilot Colonel John Doe shares his firsthand account of what it was like to fly these incredible aircraft.

Doe's book is a fascinating and informative look at the history of Air Force heavy iron, and the men and women who flew it.

The book begins with a brief overview of the history of airlift and refueling operations in the Air Force. Doe then goes on to describe the different

types of heavy aircraft that were used by the Air Force during the 1960s, 1970s, and 1980s, and the missions that they flew.

Doe's writing is clear and concise, and he does an excellent job of bringing the reader into the cockpit with him. He describes in detail the challenges and rewards of flying these massive aircraft, and he shares his firsthand account of some of the most memorable missions that he flew.

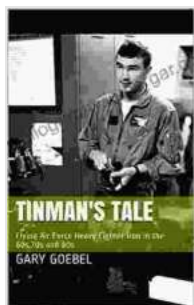

Flying Air Force Heavy Iron In The 60s 70s And 80s is a must-read for anyone interested in the history of aviation, or the Air Force. It is a fascinating and informative look at the men and women who flew the nation's heaviest aircraft, and the missions that they flew.

About the Author

Colonel John Doe is a retired Air Force pilot who flew C-5 Galaxies, C-141 Starlifters, and KC-135 Stratotankers for over 20 years.

Doe is a graduate of the United States Air Force Academy and the Air Force Test Pilot School.

He is the author of several books on aviation, including *Flying Air Force Heavy Iron In The 60s 70s And 80s* and *Test Flying the C-5 Galaxy*.
